The Channing Division of Network Medicine (CDNM), an epidemiology research unit within Brigham and Women's Hospital and Harvard Medical School, is looking to recruit new postdoctoral fellows.

Available projects include molecular/genetic epidemiology, cancer, cardiovascular disease, gastrointestinal disorders, microbiome, telomeres, metabolomics, and more.

**Qualified applicants will have, or soon expect to finish, a PhD (or equivalent) in Epidemiology, Biostatistics, Public Health, or a related discipline. The division is open to discussing a variety of start dates, but is especially interested in applicants who could start in Spring or Summer 2018.

If interested, please email a CV to Evan Busch at nhebu@channing.harvard.edu

CDNM is the home of the Nurses' Health Studies, Health Professionals Follow-Up Study, and The Growing Up Today Study. More information about the division is available at:
