The Survey of the Health of Wisconsin (SHOW) has openings for 50% graduate program assistants beginning in November 2017 or January 2018.

- **Analytic support**

We are seeking advanced graduate student support for varied projects with ancillary partners including database and codebooks development, data requests and related analyses of SHOW data. Preference will be given to students in the Population Health or similar graduate program, who possess strong analytic skills and are well versed in SAS. Preference will also be given to persons interested in using SHOW data in their thesis or dissertation work. Strong writing, interpersonal and communication skills are required.

**Dissemination and outreach**

SHOW also has openings for graduate student support for translating public health research findings for dissemination as well as for outreach work with community partners. Preference will be given to individuals having experience with descriptive data analysis and working with stakeholders in the community. Excellent verbal and written communication skills are required. Experience with desktop publishing software a plus.

For further information, please contact Tammy LeCaire by email (tjlecaire@show.wisc.edu) or phone (608) 890-3846.
